

First Plus Asset Management (Thailand) Company Limited

First Plus China Global Fund Vision (FP CNGLOV)

Type of Fund / Category of Fund

- Equity Fund / Cross Investing Fund / Fund focuses on Foreign Investment Risks
- AIMC Category : Greater China Equity

Investment Policy & Fund Strategy

- The Fund has a policy of investing in equities and securities that are based on the equity instruments of Chinese companies incorporated in China or have business operations and/or have significant business interests related to China, including CIS units and/or ETFs with the above-mentioned investment policies, which will result in the Fund's net exposure in such equities on average in an accounting year no less than 80% of NAV.

The Fund will invest in the securities mentioned above, which listed on the stock exchange are:

- Shanghai Stock Exchange (SSE) or
- Shenzhen Stock Exchange (SZSE) or
- Hong Kong Exchanges and Clearing (HKEX) or
- Taiwan Stock Exchange (Taiwan Stock Exchange Corporation: TWSE) or
- New York Stock Exchange (NYSE) or
- Nasdaq Stock Market (NASDAQ)

- The Management Company has appointed China Asset Management Co., Ltd. as the outsourced foreign investment manager of the Fund, excluding the domestic investment part.
- The Fund may invest in other mutual funds under the same Management Company on average no less than 20% of NAV in an accounting year.
- The Fund may invest in derivatives for FX hedging at the discretion of the Fund Manager or to enhance fund management performance (EPM) not exceeding 100% of NAV, but will not invest in Structured Notes.

Investment Strategy

- The Fund will invest in accordance with the Rules Based Approach with the aim of outperforming the benchmark in the long term.

Definitions

| | |
|-----------------------------------|---|
| Maximum Drawdown : | The maximum percentage of loss of a fund over the past 5 years (or since inception if the fund has been established for less than 5 years). It is measured from the highest value of the fund's NAV per unit to the lowest value during the period that the NAV per unit is depreciating. The Maximum drawdown is used to assess the risk of possible loss that could occur from investing in a fund. |
| Recovering Period : | A duration of time that let the investors know how long it will take for a fund to recover from a peak of loss to the original level of investment. |
| FX Hedging : | Percentage of foreign currency denominated assets in the investment portfolio that are hedged against foreign exchange risk. |
| Portfolio Turnover Ratio : | The trading frequency of assets in the investment portfolio during a certain period of time. It is calculated by taking either the total amount of new securities purchased or the number of securities sold (whichever is less) over a period of one year, divided by the average net asset value (NAV) of the fund over the corresponding period. A fund with high portfolio turnover indicates that the securities in the portfolio are frequently traded by the fund manager and hence high securities dealing cost. Therefore, investors must take into consideration the performance of the fund in order to determine the cost worthiness of such securities trading transactions. |
| Sharpe Ratio : | A ratio between the excess return of a fund and the risk of investment. The Sharpe ratio reveals the average investment return, minus the risk-free rate of return, divided by the standard deviation of returns for the fund. The Sharpe ratio reflects the extra return that should be received by the fund to compensate the amount of risk taken in investment. The fund with a higher Sharpe ratio is considered superior to other funds in terms of management efficiency since it provides higher excess return under the same risk level. |
| Alpha : | The excess return of a fund relative to the return of a benchmark index. A fund with high alpha indicates that it is able to beat the performance of its corresponding benchmark which is a result of the capabilities of the fund manager in selecting appropriate securities for investment or making investment in a timely manner. |
| Beta : | A measure of the degree and direction of volatility of the rate of return of assets in the investment portfolio of the fund compared to the changes in the overall market. A beta of less than 1.0 implies that the rate of return of the fund's assets is less volatile than that of the securities in the broader market whereas a beta of greater than 1.0 implies that the rate of return of the fund's assets is more volatile than that of the broader market. |
| Tracking Error : | An indication of how efficient the actual performance of the fund can replicate its corresponding benchmark. A low tracking error implies that the fund has the efficiency to generate a return on investment close to the benchmark return whereas the higher tracking error, the more divergence of the fund from its benchmark. |

Rebalancing and Adjustment of the List of Securities

The management company will rebalance the investment weight ratio (Rebalance) and adjust the list of investment securities in equity securities on a quarterly basis. In order to comply with the criteria for selection and proportion of investment in securities as set forth above. In addition, the Management Company reserves the right to adjust the list of securities of one or more companies from the list of securities in which the Fund invests at that time.

Considering the events that have occurred or there is a high risk that they will occur, the management company expects that it may have a negative impact on the price in the direction of causing the price of the company's equity securities to decrease significantly. The above actions may result in the Fund's investment not meeting the Fund's selection criteria. The management company will act in the interests of unitholders first.

In the event that the management company considers that the criteria for consideration and selection of securities The calculation of the investment ratio in securities or the rebalancing of the investment weight ratio and the adjustment of the list of securities specified above are insufficient and/or inappropriate to the investment situation at any time. The Management Company reserves the right to amend the above criteria in a manner that is not inferior to the existing criteria, such as using the valuation method as an additional criterion, etc. The Management Company will notify unitholders and/or investors of the details of the amendment of the criteria at least 3 business days in advance through the Management Company's website.
